

“Inside the Heart of the Piano” A journey into the mechanics of a grand piano

Have you ever seen up close how a grand piano really works? In this special encounter, I will bring an authentic grand piano action with me to show live the beating heart of this fascinating instrument.

We will discover together:

- How sound is born from a simple key touch
- The delicate gears that transform movement into music
- The main adjustments that make each piano unique and playable

During the program, there will be space for questions, curiosities, and spontaneous interventions: each participant will be able to observe closely, touch, and ask everything they have always wanted to know about the functioning of one of the most fascinating musical instruments.
